PART III REASONS FOR ALLOWANCE

1. This application has been examined. Claims 6-20 are being allowed over the prior art of record. Prosecution on the merits is closed in this application.

2. The following is an examiner's statement of reasons for allowance:

The prior art of record teaches different ways of transmitting data to a machine or device (such a machine tool or production machine). However the prior art of record fails to teach, or suggest the claimed limitations of (in combination with all other features in the claims), a data transmission system for use in a machine, comprising a **plurality of drive systems** each comprising an associated control functional unit wherein each control functional unit **only controls the drive system to which it is associated, control computers associated to each drive system linked through a first control network and coupled with said control functional units to perform high level process control**; a second independent network interconnecting said **control functional units for real time cross-communication there between, whereby information relating to movement control from any one of said control functional units is transmitted in real time to all of the other of said control functional units.**

Any comments considered necessary by Applicant must be submitted no later than the payment of the Issue Fee, and to avoid processing delays, should preferably accompany the Issue Fee. such submissions should be clearly labeled "comments on statement of Reasons for Allowance".

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Agne (2002/0147866) teaches a data transmission system for machine tools (applicant's previous application drawn to different features).
